Thanks Ryan. If you could also get back on the expected size of the DMU and the number of samples to be composited, that would be helpful.

Thanks,

Karl

I don't have the answer with me (I am about to step into a meeting) so I have asked our technical team. I will respond as soon as I have an answer. I anticipate it will be within the next few hours.

Subject: RAL multiplier concentration

Hi Ryan.

Karl is reviewing your slides and is wondering what the concentration of your RAL multiplier is?

Feel free to reply all.

Thanks.
